<b>Description</b>	This is a SCRUM template designed for project management in CS180. Replace this section with YOUR TEAM information
<b>Summary / Requirements</b>	This spreadsheet serves two purposes: (1) for your team to track progress during your sprints, and (2) as a record of what user stories were implemented, in which tasks, and by whom. For (1), if you prefer to use an alternate tool to track progress as you go (e.g., Trello), that is fine. However, for (2), it is critical that you keep the "Product Backlog" and "Archives" up to date, at least at the end of each sprint. Also, note that if the number of estimated points for a story ends up being very inaccurate (i.e., if the user story took much more or much less effort than expected), please update the story points estimate and give a comment explaining the adjustment.
<b>Tabs</b>	<b>Notes</b>
"Product Backlog"	Should be initialized with the user stories and their estimated efforts (i.e., story points)
	Depending on the amount of story points, some stories may need to be split into smaller stories
	Add "Acceptance Criteria" to each user story by "insert note" to a spreadsheet cell (right click the cell)
	"Acceptance Criteria" define what it means to be "Done"
"Task Board"	"To Do" is initialized with tasks defined during the Sprint Planning Meeting (i.e., sprint backlog)
	Tasks are expected to have similar sizes, each with a time cost of roughly 3-4 hours
	Add "Details" and "Acceptance Criteria" to a task by "insert note" to a spreadsheet cell (right click the cell)
	Perform task assignments at the Sprint Planning Meeting
	During a sprint, members who become available can pull tasks from the "To Do" list by moving them to "In Progress" and attaching his/her name
	Inform your teammates know before you pull a task from "To Do" list
	"To Verify" should be pulled by a different team member; This is a good time to perform code review and unit testing
	A task in "Done" list should have its verifier's name appended
"Archives"	At the end of a Sprint, finished tasks are moved to "Archives"; Unfinished tasks are moved to the next Sprint Planning Meeting
"Burndown Chart"	At the end of a Sprint, update the "Burndown Chart"
	if "Story Points (Remaining)" is above the "Ideal", it would be an indicator for slow progress

ID	Story Name	Story (small features)	Story Points	Priority	Comments	Sprint
1	Accounts	As a new user interested in using this website, I want to be able to connect a Google account as well as create an account with email & password so I can login/logout and save my tasks [1]	3	2	Adjusted to 3, refactoring and bugs	1
2	Events	As a user of this website, I want to be able to add/edit/delete events to my schedule [2]	8	1	Adjusted to 8, redid data struc and added more options	1
3	Contacts	As a user using this website, I want to be able to have a list of contacts of other people, and add contacts that exist on the website [3]	3	4		2
4	Inviting	As a user using the site, I want to be able to invite people from my contacts to new events and existing events [4]	9	3		3
5	Join Event	As a user of the site, I want to be able to join existing events by entering an event code [5]	1	8		3
6	Calendar View	As a user of the site, I want to be able to view my events in a calendar format, both my personal events and then shared events [6]	6	7		3
7	Accept/Decline	As a user of the site, and an invitee to an event, I would like to be able to accept or decline an event to an event [7]	3	6		3
8	Notifications	As a user of the site, I would like to receive notifications on the site when I am invited to events, and by email. [8]	5	5		2/3
9	View Statistics	As a user of the site, and a member of a shared event, I would like to see who is going to the event and whether they have accepted or declined. As the owner, I want to know if there enough people have accepted [9]	2	9		3
10	Filtering	As a user, I would like to mark an event under a certain category to be able to filter them by category(i.e School, Work, Business, Social). In addition, I want to be able to sort my events from earliest to latest(date/time) and vice versa, and be able to search for my events by title. [10]	4	10		3
11	Conflicts	As a user, I would also like to know if an event I am joining or creating is conflicting with another event. [11]	2	11		3
12	Profile Page	As a user, I would like to edit my profile page by including a picture and a bio. [12]	1	12		3
	<b>Total</b>		47			

To Do (Sprint Backlog)	In Progress	Testing	Done
	Task 13: Conflicts(Eric) [13]		
	Task 14: Notifications(Fangsheng/Marcus) [14]		
		Task 15: Profiles(Yulin & Mitchell)	

Sprint ID	Scrum Master	Tasks Completed	User Story ID
1	Phillip Nguyen	Task 1: Google Account (Phillip/Mitchell/Yulin) [15]	1
1	Phillip Nguyen	Task 2: Regular Account (Phillip/Mitchell/Yulin) [16]	1
1	Phillip Nguyen	Task 3: Notifications (Marcus) [17]	8
1	Phillip Nguyen	Task 4: Format Schedule (Eric) [18]	6
1	Phillip Nguyen	Task 5: Events (Phillip & Fangsheng & Eric) [19]	2
2	Phillip Nguyen	Task 5: Events (Phillip & Fangsheng & Eric) [20]	2
2	Phillip Nguyen	Task 6: Calendar View(Eric) [21]	6
3	Phillip Nguyen	Task 7: Inviting(Phillip & Fangsheng) [22]	4
3	Phillip Nguyen	Task 8: Join Event(Phillip) [23]	5
3	Phillip Nguyen	Task 9: Accept/Decline(Fangsheng) [24]	7
3	Phillip Nguyen	Task 10: View Statistics(Fangsheng) [25]	9
3	Phillip Nguyen	Task 11: Filtering(Eric) [26]	10
3	Phillip Nguyen	Task 12: Rewrite Login(Phillip) [27]	1
3	Phillip Nguyen		

[1] Acceptance Criteria:

- 1.Login with Google
- 2.Login with Email
- 3.Account on Database

[2] Acceptance Criteria:

- 1.Add event to database, display
- 2.Edit event, updates database
- 3.Delete event, updates database

[3] Acceptance Criteria

1. Add contacts by entering email
2. View the contacts
3. Error checking making sure the email is on the database

[4] Acceptance Criteria:

1. Checkbox conditionally renders invite list
2. Invite list on page 3 contains contacts, and you can check multiple people
3. The invite list is populated in the database
4. The share button on the card has the contact list from user and it adds them to list of invitees
5. Invitees see this event

[5] Acceptance Criteria:

1. Events should have code
2. Error if wrong code
3. Show joined event when you join

[6] Acceptance Criteria:

1. Calendar displays on home
2. Calendar displays multiple events
3. Calendar displays both personal & shared events
4. Calendar updates when adding

[7] Acceptance Criteria:

1. When accept invite, move user into accepted invitees
2. When decline, move user into declined

3. Show buttons for both on shared event cards

[8] Acceptance Criteria:

1. Notification when adding, editing
2. Notification when invited to event
3. Email to invitees when created

[9] Acceptance Criteria:

1. Hit drop down and see statistics
2. Visual display of ratio of people going/not going and unconfirmed
3. Automatically refresh

[10] Acceptance Criteria:

1. Sort by date/time ascending and descending
2. Filter events correctly on first page
3. Filter events on home page

[11] Acceptance Criteria:

1. Shows snackbar when conflict
2. Still adds event

[12] Acceptance Criteria:

1. Upload pic

[13] Message when conflict

[14] Sends notification on website to user when event is shared

[15] Design the login page, including the registration link

[16] Design a table for storing user accounts

[17] Emails sent out

[18] Created calendar view

[19] Add event worked,  
edit/delete incomplete

[20] User Story finished

[21] Able to select times, and display events

[22] Entire user story finished,  
able to invite others and they can see it

[23] Invite code created, and able to join using it

[24] Accept and decline buttons, moves into appropriate array

[25] Pie chart displaying ratio  
Shows list of invitees, and owner

[26] Filter by category, sort by date/time  
search works with sort too

[27] Original code did not work with react  
had to rewrite entire feature
