Project: Doodle-Scheduling Web page

Communication Channel: Facebook Messenger, Discord

Github: <https://github.com/Rikijaz/Doodle-Scheduling/invitations>

Website Description: This software project is a web-based implementation of a scheduling website like Doodle. It will allow you to create a schedule and schedule events with other people.

User Stories:

1. **Accounts:** As a new user interested in using this website, I want to be able to connect a Google account as well as create an account with email & password so I can login/logout and save my tasks
2. **Events:** As a user of this website, I want to be able to add/edit/delete events to my schedule
3. **Contacts:** As a user using this website, I want to be able to have a list of contacts of other people, and add people off this list
4. **Inviting:** As a user using the site, I want to be able to invite people from my contacts to new events and existing events
5. **Join Event:** As a user of the site, I want to be able to join existing events by entering an event code
6. **Calendar View:** As a user of the site, I want to be able to view my events in a calendar format, both my personal events and then shared events
7. **Accept/Decline:** As a user of the site, and an invitee to an event, I would like to be able to accept or decline an event to an event
8. **Notifications:** As a user of the site, I would like to receive notifications on the site when I am invited to events, and by email.
9. **View Statistics:** As a user of the site, and a member of a shared event, I would like to see who is going to the event and whether they have accepted or declined. As the owner, I want to know if there enough people have accepted (50% or more have said yes)
10. **Filtering:** As a user, I would like to mark an event under a certain category to be able to filter them by category(i.e School, Work, Business, Social). In addition, I want to be able to sort my events from earliest to latest(date/time) and vice versa, and be able to search for my events by title.
11. **Conflicts:** As a user, I would also like to know if an event I am joining or creating is conflicting with another event.
12. **Profile Page:** As a user, I would like to edit my profile page by including a picture and a bio.
